### **KARTHAVYA - SKILL DEVELOPMENT PROJECT**

Unemployment & underemployment are the two main hurdles that our society, especially the youth, is facing. And it's a fact that the ultimate solution to this problem is Entrepreneurship & Skill Development. Realizing this necessity for the empowerment of the youth, NSS Unit 209 of Nehru College of Engineering & Research Centre initiated its project 'KARTHAVYA' to promote skill acquisition & develop entrepreneurial competencies among the public, especially among the unemployed youth of the society. This project is an initiative to strengthen the N EYES (NSS Empowering Youth Employability through Skills) project of the National Service Scheme Technical Cell Kerala.

Under this project, the volunteers of the unit are to be trained first in various skills. These trained volunteers will further train the unemployed youth & the Kudumbasree units of the Thiruvilwamala Panchayath. Many skill development programs were initiated under this project which are as follows:

1. Training in Liquid Soap & Phenyl Making: Under this training program, volunteers were given practical training sessions in liquid soap, phenyl, shampoo, bathing & washing bars, dish washer making etc. The training objective was to promote entrepreneurship & self-employment among the young volunteers and impart necessary skills to them for the same.
2. LED Lamp Manufacturing from Fused CFL Lamps: The revolutionizing idea of replacing CFLs with better energy efficient LEDs is gaining popularity. But the high cost of such LED lamps available in the market makes them less affordable to the domestic households. This is the scenario where our project of making ultra-low cost LED lamps from fused CFLs. The fused CFLs, which are generally thrown away, are collected & their holders are recovered for making LED lamps. Inside these holders new circuit is placed & LED lamps are made. This project, which serves the multiple objectives of waste management & energy conservation along with skill development, was initiated by the Oorjjakendra wing of the NSS unit & the volunteers are trained in making these LED lamps.
3. Training in Paper File & Paper Bag Making: This project is a supplementary to the NO PLASTIC initiative of the unit. The volunteers of the unit are trained in making paper bag & paper files. This project has been successfully implemented & the first positive outcome is

India has to plant a sapling in the Vanamahotsav week. It helps spread awareness amongst people about the harm caused by the cutting down of trees. People celebrate Vanamahotsava by planting trees or saplings in homes, offices, schools, colleges, etc. Awareness campaigns are held at various levels. Novel promotions like free circulation of trees are also taken up by various organizations and volunteers. The planting of trees during the festival serves various purposes like providing alternative fuel, increase production of food resources, helps create shelter-belts around fields to increase productivity, provide food for cattle, offers shade and decorative landscapes, helps conserves soil deterioration, etc. The festival educates the awareness of trees among people and portrays the need of planting and tending of trees, as trees are one of the best ways to prevent global warming and reduce pollution. Vanamahotsava is celebrated as a festival of life. In India it was started as a crusade to save mother earth. The name Van Mahotsava means "the festival of trees".
